

SOLDNER CLAY MIXERS

SOLDNER clay mixers are the fastest, safest and most convenient way of mixing clay. Take your choice of two models: PROFESSIONAL, STUDIO.

Unlike other mixers, the SOLDNER mixer carries all the weight of the clay on the bottom of a slowly revolving, concrete tub. The rotating tub smashes the clay through stationary cutting bars with a slicing, chopping and wedging action. Premixing ingredients is unnecessary. There are no dangerous augers to get caught in, no sharp blades to cut and no high speed parts to avoid,
